

Saturday, 5/31/41

Dear Bob,

Under separate cover I have sent you Collyer's piece and some blow-ups from the picture and from TVA, another picture they are turning out. I thought you might have some future use for some of them and that you might care to see some still. You will receive a print of the film about Tuesday morning.

Collyer has not yet submitted his piece to Horton for approval, which he must do before it can be used. It is sent now so that any changes you may want to make can be made before it clears. He's a very cooperative fellow and I'm certain he'll be glad to accept revisions to make it fit space, etc.

Any shots you may want after seeing the picture you will get. All you need do is provide me with the edge numbers of the pictures you want.

Collyer and others at that section have seads and seads of pictures of people in the national defense program—all the big shots, etc. You can have any in 24 hours. You might be able to save some \$\$\$ this way, if in the future you have any need.

Okay re your letter. Thanks.

I'm about to leave town for the weekend. On returning I'll send up what little I have on the Wash. airport and samples of some of the pictures available. I didn't know you were already working on it. If I can help, let me know.

On the Niresta story I'll have to make another trip to Dover, Del., where they are incorporated. This will be sometime in the next couple of weeks. I'll write you in advance and let you know when, for I'll drive up to Phila. from there.

I'd like very much to seek the reaction to the R&H story. I have been told that some groups have petitioned Congress for any investigation. I hope you have all the letters and clips in Phila so I can see them.

By the way, the check hasn't yet arrived. I'd like to get it soon if I can.

Regards,

Harold
